Hi all, I just ran into the same issue with my new PC running Windows 8.1. My keyboard is a wireless Chieftech where its receiver is connected via a TRENDnet 205 KVM switch. While the keyboard worked well over the KVM switch port connected to my old XP machine it did not work with the new one over the second port of the switch.

Keys repeat uncontrollably

But when switching 4 monitors back and forth between 2 monitors, I have to manually change the input for EACH monitor. I can't wait until a Thunderbolt 3 KVM monitor switch/docking station comes out. They only have Thunderbolt 2 KVM at the moment, but soon it will be available for the latest 40gbps spec.
