Single-Engine Controls | Mercury Marine

If the distance is approx. 22 +/- 1/4 inches, then the trim limit switch is adjusted properly and the commander trim toggle switch is working in the up/down mode. Go to the trim/tilt pump assy. and make sure the purple wire connector (single wire) and the blue wire connector two blue wires on one side of the connection are not corroded or loose.

Troubleshooting: Drive Trims down but not up | Marine ...

The OD trim limit switch will only send voltage to the trim/tilt switch in the upward toggle position if the OD limit switch is below the adjusted trim limit that keeps the OD being out of the water. To test the limit switch circuit, lower the OD to the down position and slowly raise it with the trim toggle up until it stops.

Troubleshooting: Trim/Tilt Does not Work | Marine Engines ...

I'm new to all this boating stuff, but I'm trying to learn. I've got a MerCruiser 3.0L I/O with a stuck tilt/trim, when looking for possible problems I discovered two wires were cut on outdrive. The wires are dry rotted and all need to be replaced, do I need to remove entire outdrive to accomplish this? Thanks, Renee

Re: MerCruiser trim/tilt wiring Need to take a step back here: trim limit first: The trim limit switch shuts off power to the up trim if the outdrive is raised up too high, so lower the outdrive all the way down and try it. If you have a multimeter check the resistance of the trim limit wires with the outdrive down, should be 0 ohms.

MerCruiser trim/tilt wiring | Boating Forum - iboats ...

Inboard-outboard boats (I/O) use engines housed in the rear of the boat under a cowling. The propeller and prop shaft is attached to a power trim that raises and lowers this part of the engine. If the power trim malfunctions, the shaft and propeller must be raised manually. It helps to have one or two assistants with ...
