Morphometric analysis of three normal facial types in ...

The cranial base consists of three segments (ie, anterior cranial base, middle cranial base, and posterior cranial base). The anterior and posterior segments of the cranial base grow at the same rate as craniofacial skeletal growth; thus, development of these segments continues for many years in line with the growth of the jaws.

Longitudinal growth changes of the cranial base from ...

The purpose of this study was to assess the inclination of the articular eminence during the craniofacial growth period. MATERIALS AND METHODS The materials consisted of 90 dry skulls from Asiatic Indian individuals selected from a greater skull collection stored at the Orthodontic Department of Philips University in Marburg, Germany.

Changes in Articular Eminence Inclination During the ...

FRCFPD can be successfully used for replacing missing anterior tooth (Turker and Sener, J Prosthet Dent 100:254-258, 2008), in conditions which allows minimum occlusal loading of pontic, over jet and overbite not greater than 3 mm (Ricketts, Provocations and perceptions in craniofacial orthopedics: dental science and facial art/parts 1 and 2.
